PROGRAM DETAILS

This class provides an overview of the preparatory knowledge required to ensure a successful transition from ICD-9-CM to ICD-10-CM. CMS recommends that actual training for the use of the new ICD-10 code set should not begin until 2013.

In the meantime, the World Health Organization stressed that past experience demonstrates that countries providing preparatory education prior to the actual implementation had a smoother & more successful transition to ICD-10.

Outline:

- Tutorial of ICD-10-CM General Coding Guidelines & Conventions
- Review of Pertinent Medical Terminology Including Anatomy, Physiology, Pathophysiology
- Overview of Organizational & Structural Changes Between ICD-9-CM & ICD-10-CM
- Introduction of New ICD-10 Concepts
- Timeline & Recommended Resources for the Transition to ICD-10-CM

Learning Objectives

- Familiarize Participants with ICD-10-CM Guidelines & Conventions
- Identify Current Knowledge Deficits & Prepare Participants for the More Rigorous Specificity Required for the Assignment of ICD-10-CM Codes
- Highlight the Differences Between the ICD-9-CM & ICD-10-CM
- Introduce New ICD-10-CM Concepts
- Provide a Practical Timeline & Official Resources to Facilitate a Smooth Transition to ICD-10 Proficiency

This class provides the information needed NOW as well as RECOMMENDATIONS & a TIMELINE for the TRAINING that should wait until closer to the October 2013 implementation.
